*No.* 89.—The following resolution and notification of the Government of India are republished :—

DEPARTMENT OF COMMERCE.

RESOLUTION.

*Simla, the 21th October* 1925

No. 102 S.—The Committee on Life Saving Appliances which reported in 1914 considered that the existing rules regulating the carriage of such appliances on Native Passenger Ships were out-of-date, and recommended the adoption of a scale more in accordance with modern requirements. Local Chambers of Commerce which were consulted at the time were generally prepared to acquiesce in the Committee's recommendations, but owing to war conditions and to the general disorganization of shipping which was brought about by these conditions, the Government of India decided to defer the question of revising the scales. They now publish their provisional conclusions in the draft rules appended to the notification attached to this resolution

2. These draft rules follow, for the most part, the recommendations of the above Committee. The scales in the case of foreign-going ships of the first class, and also in respect of ships in the other classes launched after the 1st January 1927, have, however, been increased. The scales prescribed for foreign-going ships of the first class are based on the scales which have been prescribed for foreign-going passenger steamers under the Merchant Shipping (Life Saving Appliances) Rules, 1924. Such ships calling at ports in other British Possessions where the United Kingdom rules are in force can be compelled by the authorities there to comply with the requirements in those rules. It is clearly desirable that rules in these particulars should be as uniform as possible.

3. Any suggestions or criticisms which any person or body may wish to make in respect of the draft rules should be submitted to the local Government concerned in time to permit them to forward the same to the Government of India by the 15th day of January 1926

NOTIFICATION.

No. 103-S.—The following draft of certain rules which it is proposed to make in exercise of the powers conferred by sub-section (1) of section 191 of the Indian Merchant Shipping Act, 1923 (XXI of 1923), is published, as required by sub-section (4) of the said section, for the information of all persons likely to be affected thereby, and notice is hereby given that the said draft will be taken into consideration on or after the 15th day of January 1926. Any objection or suggestion which may be received from any person in respect to the draft before the said date will be considered by the Governor-General in Council.

*Draft Rules.*

1. (1) These rules may be called the Boats and Life Saving Appliances (Native Passenger Ships) Rules, 1925.

(2) They shall come into force on the 1st day of January 1927, from which date rule IX of the rules published with the notification of the Government of India in the Department of Finance and Commerce, No 1354, dated the 14th March 1889, shall cease to have effect.

2. In these rules unless there is anything repugnant in the subject or context—

Definitions

(1) "Approved" means approved by the Local Government.

(2) "Boat-deck" means any deck on which boats are carried and of which the space required for the stowage of boats under rule 38 occupies half or more of the length or breadth of such deck.

(3) "Daylight" means the period from one hour before sunrise until one hour after sunset

(4) "Length" in connection with a ship means the registered length of the ship

Classification of ships

3. For the purposes of these rules ships shall be classified as follows :—

(1) Foreign-going ships of the first class, in which are included steam-ships voyaging to or from ports in India or Burma from or to any ports outside India or Burma provided that no ship shall fall within this class by reason only of the fact that it voyages to or from ports in India or Burma from or to ports in the Federated Malay States or the Straits Settlements or Ceylon only.

(2) Foreign-going ships of the second class, in which are included steam-ships voyaging to or from ports in India or Burma from or to ports on the Red Sea or Persian Gulf only.

(3) Home-trade ships of the first class, in which are included steam-ships voyaging between ports in India or Burma or to or from ports in Burma from or to ports in the Federated Malay States or the Straits Settlements or Ceylon, which do not ordinarily keep within twenty miles of the coast-line.

(4) Home-trade ships of the second class, in which are included steam-ships voyaging between ports in India or Burma or to or from ports in India or Burma from or to ports in the Federated Malay States or the Straits Settlements or Ceylon, which ordinarily keep within twenty miles of the coast-line.

(5) Home-trade ships of the third class, in which are included steam-ships voyaging between ports in India or Burma or to or from ports in India or Burma from or to ports in Ceylon only, which ordinarily keep within five miles of the coast-line.

(6) Home-trade ships of the fourth class, in which are included sailing ships.

*A.—Foreign-going ships of the first class*

Davits

4. A ship of this class shall, subject to the provisions of rule 44 (1), be provided, in accordance with its length, with the number of sets of davits specified in column A of the table in Appendix I.

Provided that no ship shall be required to have a number of sets of davits greater than the number of boats required to accommodate the total number of persons which is carried, or which the ship is certified to carry, whichever number is the greater, and provided further that the local Government may, where it appears to them necessary, having regard to the height at which the boats are carried above the centre of the load line disc, and to the other circumstances of the case, require a ship of this class to carry in lieu of, or in addition to, davits, some other approved form of launching appliances, or such arrangements for launching boats as may be, in their opinion, effective.

Lifeboats

5. (1) Each set of davits shall have a lifeboat of Class I attached to it, and of these lifeboats at least the minimum number specified in column B of the table in Appendix I shall be open boats.

(2) Any additional lifeboats which may be required to make up the total lifeboat accommodation required by rule 7, may be boats of Class I or class II.

Buoyant apparatus.

6. A ship of this class shall carry, in addition to the lifeboats carried under rule 5, approved buoyant apparatus conforming to the conditions detailed in rule 37, sufficient to support twenty-five per cent of the total number of persons which is carried or which the ship is certified to carry, whichever number is the greater

Additional lifeboats.

7. (1) Where the lifeboats carried under rule 5 (1) do not furnish sufficient accommodation for the total number of persons carried or which the ship is certified to carry, whichever number is the greater, then arrangements shall be made to the satisfaction of the local Government to carry such additional lifeboats as are required to make up the deficiency in such manner that they can be stowed without in any way impeding the prompt handling of the lifeboats carried under rule 5 (1), the buoyant apparatus carried under rule 6, or the marshalling of the persons on board at the launching stations or their embarkation So far as practicable without creating such impediment, these additional lifeboats shall be distributed as follows:—

(a) One additional lifeboat under each set of davits.

(b) Other additional lifeboats, stowed on the deck or bridge, or poop, so as to be available as far as practicable for use on either side of the ship, and so secured that they will have the best chance of floating free of the ship if there is no time to launch them.

(2) Where the local Government are satisfied that in a ship of this class launched before 1st January 1927, it is not possible to carry, in the manner provided in rule 5 (1) and section (1) of this rule (7), lifeboats, in such numbers and capacity as would be sufficient to accommodate the total number of persons carried or which the ship is certified to carry, whichever number is the greater, they may allow additional approved buoyant apparatus to be carried in lieu of lifeboats sufficient for those persons for whom accommodation is not provided in lifeboats. Provided that no buoyant apparatus shall be allowed on a ship of this class in lieu of a lifeboat required by these rules unless the total cubic capacity of the lifeboats is at least equal to the greater of the two following amounts:—

Carriage of additional buoyant apparatus in lieu of lifeboats in certain cases.

(a) Seventy-five per cent of the total capacity required to accommodate all the persons carried,

(b) The minimum capacity required by column C of the table in Appendix I.

(3) The master or owner of a ship of this class claiming to carry on any voyage fewer lifeboats or in the case of a ship coming under the provisions of rule 7 (2) fewer lifeboats and approved buoyant apparatus than will provide sufficient accommodation for all the persons for which the ship is certified, must declare before the Port Officer, before the time of clearance, that the lifeboats or the lifeboats and approved buoyant apparatus, as the case may be, actually carried will be sufficient to accommodate all persons who will be carried at any time during the voyage to foreign ports and the voyage back to a port in British India, and that, in addition, approved buoyant apparatus will be carried sufficient for twenty-five per cent of all such persons

Exemptions in cases of specified voyages.

In the case of a ship coming under the provisions of rule 7 (2) and claiming to carry fewer lifeboats and approved buoyant apparatus than will provide accommodation for all the persons for which the ship is certified, a further declaration must be made by the master or owner that the total cubic capacity of the lifeboats actually carried is not less than is required by rule 7 (2), provided that no greater number of lifeboats need be carried than is sufficient to accommodate all the persons carried

Fitting of lifeboats with wireless telegraphy installations and carriage of motor boats

8. (1) Where the number of lifeboats is more than ten, one of them shall be fitted with an approved wireless telegraphy installation. Where the number of lifeboats is more than fifteen, one shall be a motor boat fitted with an approved wireless telegraphy installation complying with the provisions of rule 28 and where the number is more than twenty, two of the lifeboats shall be motor boats so fitted All such motor boats shall be fitted with searchlights.

(2) The local Government may, at their discretion, upon the application of an owner, allow a greater number of motor lifeboats to be carried if they are satisfied that the efficiency of the life-saving equipment will not thereby be diminished,

Lifebuoys.

9. If the ship is under 400 feet in length, at least twelve approved lifebuoys shall be carried; if 400 feet or over, but under 600 feet, at least eighteen approved lifebuoys shall be carried; if 600 feet or over, but under 800 feet, at least twenty-four approved lifebuoys shall be carried; and if 800 feet or over, at least thirty approved lifebuoys shall be carried.

apparatus shall be carried sufficient for those persons for whom accommodation is not provided in lifeboats

Exemptions in case of specified voyages.

13. Notwithstanding anything contained in rules 11 (2) (a) and 12, the master or owner of a ship of this class may carry on any voyage fewer lifeboats and approved buoyant apparatus than will provide sufficient accommodation for all the persons for which the ship is certified, if he desires before the Port Officer at the time of clearance that the lifeboats and approved buoyant apparatus actually carried will be sufficient to accommodate all persons who will be carried at any time during the voyage to the Red Sea or the Persian Gulf, as the case may be, and also during the voyage back to British India.

Lifebuoys. 25. A ship of this class shall carry at least two lifebuoys

Lifejackets. 26. One approved lifejacket shall be carried for each person on board

*G.—General.*

Power to accept alternatives 27. The local Government shall have power, in general or in any particular case, to accept any boat, buoyant apparatus, other life-saving appliance or arrangement, in lieu of a life-saving appliance or arrangement required by these rules, subject to such conditions as they may impose, if they are satisfied that under those conditions it will be as effective as the appliance or arrangement required by these rules.

Provided that in the case of a foreign-going passenger steamer launched on or after 1st January 1927, no life saving appliance shall be accepted in lieu of a lifeboat required by these rules, except some other approved type of lifeboat.

Classification of lifeboats 28. For the purposes of these Rules boats are arranged in the following classes :—

CLASS I.

*A.—Open lifeboats with internal buoyancy only.*

The buoyancy of a wooden boat of this type shall be provided by water-tight air cases, the total volume of which shall be at least equal to one-tenth of the cubic capacity of the boat.

In the case of a metal boat an addition shall be made to the cubic capacity of the air-tight compartments, so as to give it buoyancy equal to that of the wooden boat.

*B.—Open lifeboats with internal and external buoyancy.*

The internal buoyancy of a wooden boat of this type shall be provided by water-tight air-cases, the total volume of which shall be at least equal to seven and a half per cent of the cubic capacity of the boat.

If the external buoyancy is of cork, its volume, for a wooden boat, shall not be less than thirty-three thousandths of the cubic capacity of the boat; if of any material other than cork, its volume and distribution shall be such that the buoyancy and stability of the boat are not less than that of a similar boat provided with external buoyancy of cork.

In the case of a metal boat, an addition shall be made to the cubic capacity of the air-tight compartments, so as to give it buoyancy equal to that of the wooden boat.

*C.—Pontoon lifeboats having a well deck and fixed water-tight bulwarks.*

The area of the well deck of a boat of this type shall be at least thirty per cent of the total deck area. The height of the well deck above the water line at all points shall be at least equal to one-half per cent of the length of the boat, this height rising to one and a half per cent of the length of the boat at the ends of the well

The freeboard of a boat of this type shall be such as to provide for a reserve buoyancy of at least thirty-five per cent.

CLASS II.

*A.—Open lifeboats having the upper part of the sides collapsible.*

A boat of this type shall be fitted both with water-tight air-cases and with external buoyancy, the volume of which, for each person which the boat is able to accommodate, shall be at least equal to the following amounts :—

| | Cubic feet |
|---|---|
| Air-cases .. .. .. | 1·5 |
| External buoyancy (if of cork) .. | 0·2 |

The minimum freeboard of boats of this type is fixed in relation to their length; it shall be measured vertically to the top of the solid hull at the side amidships from the water-level when the boat is loaded.

The freeboard in fresh water shall not be less than the following amounts :—

| Length of the boat in feet. | Minimum freeboard in inches. |
|---|---|
| 26 | 8 |
| 28 | 9 |
| 30 | 10 |

The freeboard of boats of intermediate lengths shall be found by interpolation.

*B.—Pontoon lifeboats having a well deck and collapsible bulwarks.*

All the conditions laid down for boats of class II C shall be applied to boats of this type, which differ from those of class I-C only in regard to the bulwarks.

*C.—Pontoon lifeboats having a flush deck and collapsible bulwarks.*

The minimum freeboard of boats of this type is independent of their length and depends only upon their depth. The depth of the boat shall be measured vertically from the underside of the garboard strake to the top of the deck at the side amidships and the freeboard shall be measured from the top of the deck at the side amidships to the water-level when the boat is loaded.

The freeboard in fresh water shall not be less than the following amounts, which are applicable without correction to boats having a mean sheer equal to three per cent of their length :—

| Depth of boat in inches | Minimum freeboard in inches. |
|---|---|
| 12 | 2⅜ |
| 18 | 3½ |
| 24 | 5⅛ |
| 30 | 6¾ |

For intermediate depths the freeboard shall be obtained by interpolation.

If the sheer is less than the standard sheer defined above, the minimum freeboard shall be obtained by adding to the figures in the table one-seventh of the difference between the standard sheer and the actual mean sheer measured at the stem and stern post; no deduction shall be made from the freeboard on account of the sheer being greater than the standard sheer or on account of the camber of the deck.

CLASS III.

*Open boats which have not the buoyancy required for lifeboats of Class I.*

Motor boats 29. (1) A motor boat carried as part of the statutory life-saving appliances of a native passenger ship, shall comply with the following conditions :—

(*a*) It shall comply with the requirements for a lifeboat of class I, and proper appliances shall be provided for putting it into the water speedily.

(*b*) It shall be adequately provided with fuel, and kept so as to be at all times ready for use

(2) A motor boat carried in compliance with Rule 8 (1) shall in addition comply with the following conditions :—

(a) It shall be fitted with a searchlight or searchlights of a pattern approved by the local Government.

(b) It shall be fitted with an approved wireless telegraphy installation.

(3) In fixing the volume of the internal buoyancy and, where fitted, the external buoyancy, regard shall be had to the difference between the weight of the motor and its accessories, the searchlight and the wireless telegraphy installation and the weight of the additional persons which the boat could accommodate if the motor and its accessories, the searchlight and the wireless telegraphy installation were removed.

(4) Notwithstanding anything contained in the preceding sub-sections of this rule (29), a lifeboat fitted with the Fleming gear shall be accepted in lieu of a motor-boat, provided that it otherwise complies with the requirements specified in the said sub-sections.

Construction of lifeboats.

30. (1) All boats shall be properly constructed, and shall be of such form and proportions that they shall have ample stability in a seaway, and sufficient freeboard when loaded with their full complement of persons and equipment. They shall be fitted and arranged to the satisfaction of the local Government.

(2) The structural strength of the boats shall be to the satisfaction of the local Government. In the case of ships launched on or after the 1st January 1927, the strength shall be sufficient to permit of the boats being safely lowered into the water with the full complement of persons and equipment on board.

Provided that this requirement shall not apply to any ship other than a foreign-going ship of the first or second class, where the height of the boat deck above the water line at the vessel's lightest seagoing draught does not exceed 15 feet.

Seating, accommodation.

(3) In all open boats, all thwart and side seats shall be fitted as low in the boat as practicable, and shall provide seating accommodation for all persons the boat is deemed fit to carry, and bottom boards shall be fitted so that the thwarts shall not be more than 2 feet 9 inches above them.

Buoyancy.

(4) Internal buoyancy apparatus shall be constructed of copper or yellow metal of not less than 18 ounces to the superficial foot, or of other durable material, and in open boats of Class I may be placed along the sides or at the ends of the boat, but not in the bottom of the boat. External buoyancy apparatus may be of cork or of any other equally efficient approved material; the use of rushes, cork shavings, loose granulated cork, or any other loose granulated substance, and the use of apparatus dependent upon inflation by air is prohibited.

Sheer.

(5) Open lifeboats of Class I shall have a mean sheer at least equal to four per cent of their length.

Pontoon lifeboats.

(6) Pontoon lifeboats may be built of wood or metal. If constructed of wood, they shall have the bottom and deck made of two thicknesses with textile material between; if of metal, they shall be divided into watertight compartments with means of access to each compartment and shall be provided with at least two bilge pumps.

(7) All pontoon lifeboats shall be fitted with efficient means for quickly clearing the deck of water. The orifices for this purpose shall be such that the water cannot enter the boat through them when they are intermittently submerged. The number and size of the orifices shall be determined by the local Government for each type of boat by a special test.

For the purpose of this test—

(a) The pontoon boat shall be loaded with a weight of iron equal to that of its complement of persons and equipment ;

(b) In the case of a boat 28 feet in length, two tons of water shall be cleared from the boat in a time not exceeding the following :—

| | | |
|---|---|---|
| Class IC | . . | 60 seconds |
| „ IIB | .. .. | 60 „ |
| „ IIC | .. .. | 20 „ |

In the case of a boat having a length greater or less than 28 feet the weight of water to be cleared in the same time shall be for each type directly proportional to the length of the boat.

(8) No boat shall be accepted as a lifeboat the buoyancy of which depends upon the previous adjustment of one of the principal parts of the hull.

(9) All boats shall be fitted for the use of a steering oar.

Marking of lifeboats.

(10) All boats shall be permanently marked to the satisfaction of the local Government in such a way as to indicate plainly their dimensions and the number of persons for which they are approved. Boats that have been properly marked need not be re-measured, unless there is reason to believe that the marks have been tampered with or are otherwise defective or improper.

Number of persons.

31. (1) The number of persons which a lifeboat shall be deemed fit to carry shall be equal to the greatest whole number obtained by dividing the capacity of the boat in cubic feet, or the surface of the boat in square feet, as the case may be (calculated as provided by Rules 32 and 33), by the standard unit of capacity, or unit of surface, defined below.

(2) The cubic capacity in feet of a boat in which the number of persons is determined by the surface shall be assumed to be ten times the number of persons which the boat is authorized to carry.

(3) The standard units of capacity and surface are as follows :—

Units of capacity.

| | | Cubic feet |
|---|---|---|
| Class IA | .. .. .. | 10 |
| „ IB | .. .. .. | 9 |
| „ III | .. .. .. | 10 |

Units of surface

| | | Square feet |
|---|---|---|
| Class IIA | .. .. .. | 3½ |
| „ IIC | .. .. .. | |
| „ IC | .. .. .. | 3¼ |
| „ IIB | .. .. .. | |

(4) The local Governments may accept a smaller divisor for pontoon boats of Class IC and Class IIB if they are satisfied after trial that the number of persons for whom there is seating accommodation in the boat in question is greater than the number obtained by applying the above divisor provided always that the divisor adopted in place of 3½ shall never be less than 3.

(5) The number of persons obtained by the above rules shall be reduced—

(i) if it is greater than the number of persons for which there is proper seating accommodation, the latter number being determined in such a way that the persons when seated do not interfere in any way with the use of the oars, or

(ii) if, in the case of boats other than open boats of Class I, the freeboard when the boat is fully loaded is less than the freeboard required by these rules.

(6) If the Government Surveyor is doubtful as to the number of persons any boat is fit to carry, he may require the boat to be tested afloat with the intended number of persons on board.

Test afloat.

(7) The local Government may limit the number of persons to be allowed in boats with very fine ends and in boats very full in form.

(8) Two children under the age of twelve years may be carried in place of one adult person.

Children

32. (1) In the case of an open boat of Class I the cubic capacity shall be determined by the following formula:—

Cubic capacity of Open Boats of Class I.

$$\text{Capacity} = \frac{l}{12}(4A + 2B + 4C)$$

$l$ denotes the *length* of the boat in feet from inside of the planking or plating at the stem to the corresponding point at the stern post; in the case of a boat with a square stern, the length is measured to the inside of the transom.

$A$, $B$, $C$ denote respectively the *areas of the cross-sections at the quarter* length forward, amidships, and the quarter length aft, which correspond to the three points obtained by dividing $l$ into four equal parts (the areas corresponding to the two ends of the boat are considered negligible).

The areas $A$, $B$, $C$ shall be deemed to be given in square feet by the successive application of the following formula to each of the three cross-sections:—

$$\text{Area} = \frac{h}{12}(a + 4b + 2c + 4d + e).$$

$h$ denotes the *depth* measured in feet inside the planking or plating from the keel to the level of the gunwale, or, in certain cases, to a lower level, as determined hereafter.

$a$, $b$, $c$, $d$, $e$ denote the horizontal *breadths* of the boat measured in feet to the inside of the planking at the upper and lower points of the depth and at the three points obtained by dividing $h$ into four equal parts ($a$ and $e$ being the breadths at the extreme points, and $c$ at the middle point, of $h$).

(2) If the sheer of the gunwale, measured at the two points situated at a quarter of the length of the boat from the ends, exceed 1 per cent of the length of the boat, the depth employed in calculating the area of the cross-sections $A$ or $C$ shall be deemed to be the depth amidships plus 1 per cent of the length of the boat.

(3) If the depth of the boat amidships exceeds 45 per cent of the breadth, the depth employed in calculating the area of the midship cross-section $B$ shall be deemed to be equal to 45 per cent of the breadth, and the depth employed in calculating the areas of the quarter length sections $A$ and $C$ shall be obtained by increasing this last figure by an amount equal to 1 per cent of the length of the boat, provided that in no case shall the depths employed in the calculation exceed the actual depths at those points.

(4) If the depth of the boat is greater than 4 feet, the number of persons given by the application of these Rules shall be reduced in proportion to the ratio of 4 feet to the actual depth, until the boat has been tested afloat with that number of persons on board, all wearing life jackets, and the test has proved satisfactory.

(5) The cubic capacity of a boat may be assumed to be the product of the length, the breadth and the depth multiplied by 0·6 in cases where it is clear that this formula does not give a greater capacity than that obtained by the above method. The dimensions shall then be measured in the following manner:—

*Length*: From the intersection of the outside of the planking with the stem to the corresponding point at the stern post or, in the case of a square stemmed boat, to the after side of the transom.

*Breadth*: From the outside of the planking at the point where the breadth of the boat is greatest.

*Depth*. Amidships inside the planking from the keel to the level of the gunwale, but the depth used in calculating the cubic capacity may not in any case exceed 45 per cent of the breadth.

In all cases the shipowner shall have the right to require that the cubic capacity of the boat shall be determined by exact measurement.

(6) If the oars are pulled in rowlocks, the bottom of the rowlocks shall be considered as the gunwale in measuring the depth of the boat.

(7) The cubic capacity of a motor-boat shall be obtained from the gross capacity by deducting a volume equal to that occupied by the wireless telegraphy installation, the searchlight, the motor and its accessories.

Cubic capacity of motor boats.

33. In the case of boats of these types the surface area in square feet shall be determined by the following formula:—

Deck area and capacity of Pontoon Boats and of Open Boats of Class II.

$$\text{Area} = \frac{l}{12}(2a + 1{\cdot}55 + 4c + 1{\cdot}5d + 2e)$$

$l$ denotes the *length* in feet from the intersection of the outside of the planking with the stem to the corresponding point at the stern post.

$a$, $b$, $c$, $d$, $e$ denote the *horizontal breadths* in feet outside the planking at the points obtained by dividing $l$ into four equal parts and subdividing the foremost and aftermost parts into two equal parts ($a$ and $e$ being the breadths at the extreme subdivisions, $c$ at the middle point of the length, and $b$ and $d$ at the intermediate points).

34. No boat carried in compliance with these Rules shall have a capacity of less than 125 cubic feet.

Size of boats

35. In the tests prescribed by these Rules for determining the number of persons which a boat can accommodate each person shall be assumed to be an adult person wearing a life-jacket.

Weight of persons.

In verifications of freeboard the pontoon boats shall be loaded with a weight of at least 135 lbs. for each adult person that the pontoon boat is authorized to carry.

36. (1) The davits shall be of approved form and shall be suitably placed to the satisfaction of the local Government. They shall be fitted on one or more of the decks in such positions that the boats can be efficiently lowered from them, and shall be so spaced and placed that the boats can be swung out with facility. Davits shall not be fitted in the bows of a ship, but they may be fitted in any other position in the ship, provided that the boats are not brought into dangerous proximity to a propeller at the time of launching.

Appliances for lowering boats

(2) The davits, falls, blocks, and all other gear required for lowering the boats shall be of sufficient strength to the satisfaction of the local Government. In the case of ships launched on or after the 1st January 1927, they shall be of such strength that the boats can be lowered safely with the full complement of persons and equipment, the ship being assumed

to have a list of 15 degrees; Provided that this requirement shall not apply to any ship other than a foreign-going ship of the first or second class, where the height of the boat deck above the water line at the vessel's lightest sea-going draught does not exceed 15 feet.

(3) In the case of ships launched on or after the 1st January 1927, the davits shall be fitted with gear of sufficient power to ensure that the boats can be turned outboard against the maximum list under which the lowering of the boats is possible, or the davits shall be of the quadrant or other such type as will ensure the above condition being fulfilled; provided that this requirement shall not apply to any ship other than a foreign-going ship of the first or second class, where the height of the boat deck above the water line at the vessel's lightest sea-going draught does not exceed 15 feet.

(4) The boat's falls shall be long enough to lower the boat into the water with safety when the vessel is light. Life-lines shall be fitted to the davit spans, and shall be long enough to reach the water when the vessel is light. Hooks shall not be attached to the lower tackle blocks.

(5) Means shall be provided for speedily, but not necessarily simultaneously or automatically, detaching the boats from the falls, the boats placed under davits shall be attached to the falls and kept ready for service; the points of attachment of the boats to the falls shall be sufficiently away from the ends of the boats to ensure their being easily swung clear of the davits, the boats' chocks shall be of such construction and arrangement as shall be satisfactory to the local Government.

(6) Where more boats than one are served by the same set of davits, arrangements shall be made to prevent the falls fouling when they are recovered, and, where more than two boats are served by the same set of davits, there shall be provided an approved appliance for lowering the boats in turn and rapidly.

(7) The local Government may accept in lieu of davits or sets of davits any other appliance, appliances, or arrangements, which appear to them at least as effective as davits for placing the boats in the water.

Buoyant Apparatus.

37 Approved buoyant apparatus, whether buoyant deck seats, buoyant deck chairs or other buoyant apparatus, shall be deemed sufficient, so far as buoyancy is concerned, for a person or number of persons to be ascertained by dividing the number of pounds of iron which it is capable of supporting in fresh water by 32, and if the apparatus depends for its buoyancy on air shall not require to be inflated before use.

Such approved buoyant apparatus shall comply with the following conditions:—

(1) It shall be of approved material and construction.

(2) It shall be reversible.

(3) It shall be of such size, strength and weight that it can be handled without mechanical appliances and, if necessary, can be thrown from the vessel's deck on which it is stowed.

(4) The air-cases or equivalent buoyancy shall be placed as near as possible to the sides of the apparatus.

(5) It shall be marked in such a way as plainly to indicate that it is buoyant and the number of persons for which it is approved.

Stowage of Boats, Rafts, etc.

38. (1) All boats attached to davits and all boats stowed under boats attached to davits shall be stowed in such a way that—

(a) They can be launched in the shortest possible time;

(b) They will not impede in any way the prompt handling of any other of the lifeboats attached to davits or stowed under boats attached to davits or the buoyant apparatus carried under Rule 6, or the marshalling of the persons on board at the launching stations, or their embarkation;

(c) Even under conditions of list and trim unfavourable from the point of view of the handling of the boats as large a number of persons as possible can be embarked in them;

(d) Except as hereinafter provided, they shall be stowed as not to require lifting before being launched.

(2) With regard to the stowage of other additional lifeboats and buoyant apparatus the following provisions shall apply—

(a) They must not impede in any way the prompt handling of the lifeboats attached to davits or the additional boats stowed under boats attached to davits or the buoyant apparatus or the marshalling of the persons on board at the launching stations or their embarkation;

(b) The lifeboats may be stowed one above the other or they may, subject to such conditions as the local Government may impose, be fitted one within another, but where boats so fitted require lifting before being launched, they shall only be permitted if attached to davits operated by mechanical power appliances;

(c) The lifeboats may be stowed in rows across a deck, bridge or poop;

(d) As large a number of the boats as possible shall be capable of being launched on either side of the ship, either by means of approved appliances for transferring them from one side of the deck to the other, or by stowing in rows across the deck, or by some other equally satisfactory means;

(e) Means shall be provided to the satisfaction of the local Government for lowering the lifeboats into the water in the shortest possible time.

(3) Where a boat is stowed underneath another boat there shall be provided approved removable supports or other approved appliances, so as to secure that the weight of a boat is not unduly supported by the boat underneath it.

(4) Boats may only be stowed on more than one deck on condition that proper measures are taken to prevent the boats from a lower deck being fouled by those from a deck above.

(5) All buoyant apparatus shall be so stowed as to be readily available in case of emergency.

Equipment for boats and buoyant apparatus.

39. (1) Every boat which is carried by any ship shall be equipped as follows:—

(a) With the full single banked complement of oars and two spare oars, and a steering oar.

(b) With two plugs for each plug hole, attached with lanyards or chains, and one cat and a half of thole pins or crutches, attached to the boat by sound lanyards. Plugs shall not be required where proper automatic valves are fitted.

(c) With a sea anchor, a bailer, a galvanized iron bucket, a rudder and a tiller, or yoke and yoke lines, a painter of sufficient length, and a boat-hook. The rudder, the bailer, and the bucket shall be attached to the boat by sufficiently long lanyards, and kept ready for use.

(d) With a vessel capable of holding one quart for each person that the boat is deemed fit to carry. This vessel shall be kept filled with fresh water, and provided with a dipper with lanyard.

(e) With two hatchets, one to be kept in each end of the boat, and to be attached to the boat by a lanyard.

(f) With a line securely becketted round the outside of the boat.

(g) With an efficient lantern trimmed, with oil in its receiver sufficient to burn eight hours; or with some other lantern or light at least as effective approved by the local Government.

(2) In addition to the equipment prescribed above, the boats in foreign-going ships shall be equipped as provided in paragraphs (a) to (f), inclusive, of this sub-section of this Rule. The boats in Home-trade ships shall be provided with the additional equipment specified in paragraphs (b), (d) and (e) of this sub-section of this Rule.

(a) With a mast or masts, and with at least one good sail and proper gear for each; but this does not apply to an approved motor boat.

(b) With an efficient compass.

(c) With an air-tight case containing two pounds of biscuits for each person for whom the boat is approved.

(d) With one gallon of vegetable or animal oil, and a vessel of approved pattern for distributing it on the water in rough weather. This vessel shall be capable of being attached to the sea anchor.

(e) With one dozen self igniting red lights in a water-tight tin, and a box of suitable matches in a water-tight tin.

(f) With 1 lb of condensed milk for each person the boat is certified to carry.

(3) All buoyant apparatus carried by a foreign-going ship shall be equipped as follows:—

(a) With two paddles and one boathook or two paddles and boathooks combined attached to the buoyant apparatus by lanyards.

(b) A painter of sufficient length.

(c) A line securely becketted round the outside of the apparatus.

(d) A self igniting light and two signal flares of approved pattern, the self-igniting light to be attached to the buoyant apparatus by lanyards of suitable length;

Provided that on buoyant apparatus, designed to support less than twenty five persons the paddles, boathook and flares need not be carried.

(4) All buoyant apparatus carried by a Home-trade ship shall be provided with a suitable approved equipment.

(5) All boats and buoyant apparatus shall be fully equipped before the ship leaves harbour, and the equipment shall remain in the boat or buoyant apparatus throughout the voyage, while the ship is at sea or shall be stowed in some convenient place where it will be immediately available in case of emergency.

Side Ladders

40. In all ships, approved rope ladders shall be carried in proportion to the number of davits fitted, namely, not less than one ladder for each two sets of davits, provided that no ship shall be required to carry more than 10 ladders. The ladders shall be of sufficient length to reach the waterline at the vessel's lightest sea-going draught, and shall be carried in such a manner as to be always available for use in embarking the persons in the boats or rafts.

Illumination

41. On all foreign-going steamships in which the boat deck is more than 30 feet above the water, provision shall be made for the illumination from the ship of the life boats when alongside and in process of or immediately after being launched.

Life-jackets

42. An approved life-jacket shall mean a jacket of approved material and construction which is capable of floating in fresh water for 24 hours with 15 lb. of iron suspended from it, or any other approved appliance of equal buoyancy and capable of being fitted on the body. It shall be reversible and suitable both for adults and children. Life-jackets the buoyancy of which depends on air compartments are prohibited.

Lifebuoys

43. (1) (a) An approved lifebuoy shall be of solid cork or other equivalent material. It shall be capable of floating in fresh water for at least 24 hours with 32 lb. of iron suspended from it.

(b) Lifebuoys filled with rushes, cork shavings, granulated cork or any other loose granulated material, or whose buoyancy depends upon air compartments requiring inflation, are prohibited.

(2) All lifebuoys shall be fitted with beckets securely seized, and at least one on each side of the ship shall be fitted with a life-line at least 15 fathoms in length.

Position of Lifebuoys and Life-jackets.

44. All lifebuoys and life-jackets shall be suitably placed to the satisfaction of the Government Surveyor and so as to be readily accessible to all persons on board; and their position shall be plainly indicated so that it may be known to those for whom they are intended.

Lifebuoys shall always be capable of being rapidly cast loose and shall not be rigidly secured in any way.

Life-jackets may be stored either in buttons over the passenger decks or in boxes under the charge of stewards as well as in the buoyant seats when these are used. The contents of the boxes should be clearly painted on them and illustrated notices in the vernacular should be posted up in different parts of the ship explaining to passengers where to find life jackets and how to use them. In addition, their use should be demonstrated by the crew both during boat drills and periodically at other times.

Exemption

45. (1) Any boat which forms part of the equipment of a ship that was launched before the date of the promulgation of these rules and which has been inspected and approved by the Local Government before that date, may be accepted as equivalent to a lifeboat for a period of two years from that date, as long as it remains in good condition.

(2) Boats which were ordered before the date of the promulgation of these rules in order to complete the equipment of a ship, but which were not delivered in time to be inspected by the local Government before that date, may be accepted as equivalent to lifeboats for a period of two years from that date, so long as they remain in good condition.

Provided that such boats shall not be so accepted, unless—

(a) they have been inspected, where this has not already been done;

(b) they would have complied with the requirements of the rules in force prior to the promulgation of these rules.

46. (1) If it appears to the Government Surveyor on the application of the owner of any ship, that it is not practicable or reasonable to fit in that ship the number of sets of davits required by these rules, he may direct that one or more sets of davits may be dispensed with in that ship subject to such conditions, if any, as he may require.

Provided that, in the case of a foreign-going ship the number of davits fitted shall not be less than the minimum number of open boats of the first class except in the following case :—

When a ship has been granted a passenger certificate previous to the introduction of these rules, the minimum number of sets of davits may, if the ship is between 245 feet and 460 feet in length, be one less, and if the ship is 460 feet or more in length, two less (one on each side of the ship) than the minimum number of open boats specified in Column B of the Table in Appendix I to these rules

Provided further that in the case of a foreign-going ship the owner of the ship in question shall be required to prove, by a test made in the presence of a Government Surveyor, that all the boats can be launched on a time to be fixed by him. The conditions of this test shall be as follows :—

(a) the ship shall be upright and in smooth water ;

(b) the time shall be the time required from the beginning of the removal of the boat covers, or any other operation necessary to prepare the boats for lowering, until the last boat or pontoon raft is afloat ;

(c) the number of men employed in the whole operation shall not exceed the total number of boat hands that will be carried on the vessel under normal service conditions ;

(d) each boat, when being lowered, shall have on board at least two men, and its full equipment as required by these rules

(2) The Government Surveyor may in his discretion impose as a condition of such exemption as aforesaid in respect of a home-trade ship of the first or second class, launched before the introduction of these rules, that the boats carried shall be of a required capacity greater than the minimum capacity prescribed in rule 34.

(3) If it appears to the local Government, on the application of the owner of any ship that it is not practicable or reasonable in a particular case to require that pontoon life-boats, made before the date of the promulgation of these rules, and carried on ships of which the keel was laid on or before that date, shall have the minimum freeboard specified in these rules, or the bottom and deck made in two thicknesses with textile material between, the local Government may in their discretion dispense with full compliance with the rules in these respects until two years from that date, subject to such conditions, if any, as the local Government may impose.

(4) If a small ship is unable to carry more than one boat, the local Government may in their discretion exempt that ship from carrying more than one, but whenever one boat only is carried there shall be proper provision to enable it to be placed readily in the water on either side of the ship

(5) If it appears to the Government Surveyor that it is impracticable to carry the number of boats required by these rules, the possible number (in the absence of large structural alterations) shall be found by measurement, after taking into consideration the practicability of launching these boats in rough weather.

47. Boat's crews shall be carried in all ships to which these rules apply on the following scale, namely :—

Manning of life-boats, etc.

| | |
|---|---|
| 28 feet boats over and under this length. | 1 officer or petty officer and 4 men. |
| 26 feet boats over and under 28 feet. | 1 officer or petty officer and 3 men. |
| 20 feet boats over and under 25 feet | 1 officer or petty officer and 2 men. |
| Under 20 feet .. .. | 1 man |

48. From a date to be notified by the Governor General in Council each life-boat shall be in charge of a minimum number of life-boatmen holding certificates issued under the authority of the local Government concerned. In order to obtain the certificates, the men must prove that they have been trained in all the operations connected with the launching of life-boats and the use of oars; that they are acquainted with the practical handling of the boats themselves; and further that they are capable of understanding and answering the orders relative to life boat service.

Life-boatmen.

49. A man capable of working the motor shall be assigned to each motor boat. The allocation of certificated life-boatmen to each boat and raft shall remain within the discretion of the master according to circumstances. The officer or petty officer placed in charge of each boat or set of rafts shall have a list of its crew and shall see that the men placed under his orders are acquainted with their several duties and stations. The duty of seeing that the boats, pontoon-rafts and other life-saving appliances are at all times ready for use shall be assigned to one or more officers

Motormen.

50. The muster list shall assign duties to the different members of the crew in connection with—

Masters and drills.

(a) the launching of the boats attached to davits ;

(b) the preparation of the other boats ;

(c) the equipment of the boats generally ;

(d) the closing of the bulkhead doors, etc. ;

(e) the mustering of the passengers.

It shall also assign to the members of the Steward's Department their several duties in relation to the passengers at a time of emergency. These duties shall include—

(a) warning the passengers ;

(b) seeing that they are dressed and have put on their life-jackets in a proper manner ;

(c) assembling the passengers ;

(d) keeping order in the passages and on the stairways and generally controlling the movements of the passengers.

51. The muster-list shall specify definite alarm signals for calling all the crew to their boat and fire stations and shall give full particulars of these signals. Before the vessel sails, the Master shall draw up and exhibit the muster-list and the proper authority shall be satisfied that the muster-list has been prepared for the ship and posted in several parts of the ship and in particular in the crew's quarters.

Muster-list.

52. (1) In all ships to which these rules apply, a boat drill and a water tight door drill shall be held as soon as possible after leaving the original port of departure and at convenient intervals of not less than a week during the voyage. Such drills shall be recorded in the official log.

Drill

(2) In case of ships engaged in the home trade where the voyage is of less than one week's duration, one at least of each of these drills shall be held during each voyage, but in cases in which the voyage is such and of such short duration as to make compliance with these requirements impracticable, the local Government shall prescribe a suitable procedure for each class of restricted home trade passenger certificate issued.

(3) The Government Surveyor shall be satisfied, in each case before the ship leaves port, that a return has been devised and communicated to each officer of the ship for securing an efficient working of the boats. In all cases a police system shall be organised to the satisfaction of the Government Surveyor so as to secure obedience to orders

and proper control and guidance of all on board in times of emergency.

(4) In carrying out the boat and water-tight door drills the crew will, when practicable, drill in their life-jackets and arrangements shall be made, when possible, for passengers to see the crew putting their life-jackets on. Entries in the official log shall state whether and when this has been done.

Emergency boat.

53. In all ships which are required under these rules to carry two or more boats, an emergency boat shall be carried along and kept ready for action every night except in the case of such classes of restricted home trade voyage as may be specially exempted from the requirements of this rule by the local Government.

Boat-decks.

54. Special boat decks shall be kept entirely clear of passengers, and in the case of bridge-decks and poop-decks, which are utilised for carrying passengers as well as boats and rafts, a space sufficient for the working of the boats and rafts shall be railed off.

Time allowed for launching.

55. (1) No boats, or buoyant-coats the whole of which cannot be efficiently put into the water in one hour shall be deemed to form part of the equipment required in these respects for any vessel.

(2) The equipment of boats, and buoyant-coats of any vessels shall not be passed by the Government Surveyor as satisfying these rules unless the whole of it can be efficiently placed in the water in one hour.

### NOTIFICATION.

*[G.O. No. 441, Law (Legislative)].*

*No.* 72.—The following resolution of the Government of India is republished :—

HOME DEPARTMENT

PUBLIC.

*Simla, the 20th October* 1925.

No. F.-686/25.—On the 16th September 1924 the Legislative Assembly by a majority of one vote adopted the following Resolution :—

> "This Assembly recommends to the Governor-General in Council that the rules made under the Government of India Act, 1919, for elections to the Indian and Provincial Legislatures, be so amended as to remove all the disqualifications which are at present imposed upon any person against whom a conviction by a criminal court involving a sentence of transportation or imprisonment for a period of more than one year is subsisting, after he has endured the punishment to which he was adjudged or been pardoned for the offence concerned."

The Resolution was opposed by Government, but the Governor-General in Council has now again carefully considered the question.

2 Under the old regulations for election to the Imperial and Provincial Legislative Councils any sentence of imprisonment for an offence punishable with imprisonment for a term exceeding six months or an order to furnish security for good behaviour constituted a permanent disqualification for election as a Member of one of the Councils unless the sentence or order had been reversed or remitted, or the offender had been pardoned, or unless the disqualification had been removed by an order of the executive government concerned. The Joint Select Committee on the Government of India Bill of 1919 suggested that the stringency of these provisions should be mitigated by providing that a criminal conviction which actually entailed a sentence of more than six months' imprisonment should be a disqualification but only for five years from the date of the expiration of the sentence. That is, the disqualification instead of being permanent would last for five years, and a definite sentence of more than six months' imprisonment instead of only a sentence of imprisonment for an offence punishable with imprisonment for more than six months was required. The proposal was accepted and effect was given to it in sub-rule (2) of rule 5 of the electoral rules applicable to provincial legislative councils and to the two Chambers of the Indian Legislature. The terms of that sub-rule were as follows :—

> "(2) A person against whom a conviction by a criminal court involving a sentence of transportation or imprisonment for a period of more than six months is subsisting shall, unless the offence of which he was convicted has been pardoned, not be eligible for election for five years from the date of the expiration of the sentence."

3. The question was reconsidered by the Government of India in 1923. It appeared to them that in the circumstances of India a disqualification which would subsist for a period after the expiration of a sentence of imprisonment for a criminal offence was necessary, and that it was impossible to provide in the rules any form of words which would properly distinguish between those sentences of imprisonment which should not constitute a disqualification and those sentences which should do so. Any provisions which would permit of the automatic removal of the disqualification were therefore regarded as impossible, and it was considered that each case must be considered on its individual merits. Under the rule the disqualification could be removed by the exercise of the prerogative power of pardon by His Excellency the Governor-General, but the adoption of such a course in many cases is open to the objection that the grant of a free pardon involves the removal, not only of the effect of the conviction but also of the conviction itself. On the other hand, it appeared to the Government of India that it should be possible to permit of the removal of the disqualification in the case of, for example, the honest thinker who might have overstepped the law and might have been prosecuted in a moment of tense atmosphere. They accordingly recommended for the sanction of the Secretary of State in Council that local Governments should be empowered to remove the disqualification on application made by the person concerned and that, in order to secure some measure of uniformity, the exercise of this power should be subject to the approval of the Governor General in Council. The recommendations were referred by the Secretary of State to the Standing Joint Committee on Indian Affairs in July 1923, but the Committee did not advise their adoption because of the approaching adjournment of Parliament which would have meant that Parliament would have no opportunity of exercising the control provided in section 129-A, sub-section (3), of the Government of India Act. The proposals came again before the Standing Joint Committee in July 1924, when after rejecting various amendments the Committee, on the motion of Lord Cheyd, advised the Secretary of State to adopt the proposals of the Government of India.

4. Before the Secretary of State had given effect to the advice of the Joint Select Committee the question was again considered by the Reforms Enquiry Committee in paragraph 72 of their report. The recommendation of the Committee was summarized as follows :—

> "The existing disqualification from being a member of either Chamber of the Indian legislature or of a provincial council which follows from a conviction by a criminal court should be modified—
>
> (i) by increasing the period of sentence which constitutes a disqualification from six months to one year ; and
>
> (ii) by enabling it to be removed, subject to provisions to secure uniformity, by orders of the local Government instead of only by pardon."

The Government of India then repeated their recommendation of 1923 which was in conformity with the second part of the Committee's recommendation and in addition recommended the exemption of persons sentenced to one year's imprisonment or less from disqualification. These recommendations were sanctioned by the Secretary of State in Council and the necessary amendments to sub-rule (2) to rules 5 and 23 of the various electoral rules were notified in the Home Department notifications, dated the 23rd July 1925. The terms of sub-rule (2) of rule 5 are now as follows :—

*Sub-rule (2) of rule 5 of the electoral rules for the two Chambers of the Indian Legislature.*

"(2) A person against whom a conviction by a criminal court involving a sentence of transportation or imprisonment for a period of more than one year is subsisting shall, unless the offence of which he was convicted has been pardoned, not be eligible for election for five years from the date of the expiration of the sentence.

Provided that, on application made by a person disqualified under this sub-rule, and with the previous approval of the Governor General in Council,

the local Government of a province may by order in this behalf remove the disqualification in respect of eligibility of such person for election as a member of the Council of State / Legislative Assembly to represent any constituency within that province."

*Sub-rule (2) of rule 5 of the provincial electoral rules.*

"(2) A person against whom a conviction by a criminal court involving a sentence of transportation or imprisonment for a period of more than one year is subsisting shall, unless the offence of which he was convicted has been pardoned, not be eligible for election for five years from the date of the expiration of the sentence

Provided that, on application made by a person disqualified under this sub-rule, and with the previous approval of the Governor-General in Council, the local Government may remove the disqualification by order in this behalf."

5 A sentence of more than one year's imprisonment must now have been imposed before there is any disqualification, and further it is open to the local Government, with the approval of the Governor-General in Council, on the consideration of the circumstances of any individual case, to remove the disqualification The rules require an application by the person disqualified; but any person, who desires to stand for election for any of the local Councils or for either Chamber of the Indian Legislature, has only to address the local Government in a written application; give particulars of the sentence which constitutes a disqualification in his case; say that he wishes to stand for election; and ask that the disqualification may be removed The local Government will then be in a position to consider the circumstances of the conviction in his case. By the amendments which have been made the stringency of the previous provisions has been considerably mitigated, and elasticity has been introduced. After careful consideration of the views urged in the debate in the Legislative Assembly the Governor-General in Council has decided that there is no sufficient reason to modify the conclusions which have been reached so recently, and that in the existing conditions of India it would not be in the public interests to provide for any further relaxation of the provisions.

2. The orders in G O. No. 189 W., dated 9th February 1923, sanctioning certain concessions to piecework ers in the Godavari Northern and Kornput divisions will continue to be in force.

ANNEXURE

*Rules for hire of tools, plant and machinery of the Public Works Department from one division to another and to local bodies, contractors, etc*

The following rules govern the hire of tools, plant and machinery in the Public Works Department Stores including Divisional stores, to other divisions, Government departments, local bodies, contractors, etc :—

1 Ordinarily heavy plant and machinery alone should be let out on hire. Light and petty tools such as carpenters', blacksmiths' or fitters' tools should not be hired out at all, except as provided in rule 10, either to local bodies or to private parties.

2 Ordinarily, if plant and machinery are likely to be required for a continuous period of three years, the articles required should be purchased outright instead of being hired, and, on completion of the work, if no longer required, the same can be returned to the Officer in charge of the Stores, who, after examination, may, if they are still serviceable, take them over at a valuation.

3 The hire charges payable under these rules should be recovered monthly in advance except in the case of Government departments, local bodies and contractors doing Government work in which cases they may be recovered monthly in arrears.

A deposit should be taken in all cases from private individuals including contractors requiring the tools and plant for use on non-Government works.

4 A formal agreement in the form now in use (Annexure to G.O. No. 627 W., dated 27th May 1924), should be entered into by the Officer in charge of the Stores, for all plant, machinery and tools hired out to local bodies, contractors and private parties.

5. In addition to the rent payable under these rules the person hiring the tools, plant and machinery should also pay—

(i) All transit and incidental charges in connexion with the despatch of the tools, plant and machinery from the Stores, and return thereto.

(ii) The cost of replacing, missing or broken parts or of repairs necessitated by any definite or specific damage.

6 For the purpose of fixing the rates of hire (vide rule 7), heavy plant and machinery shall be divided into two classes—

*Class A*.—Plant and machinery which, in fairly constant use, is likely to have a life of twenty years. For example, portable steam-engine, steam road-rollers, slow-speed oil-engine of the Hornsby, Crossley and similar types, centrifugal pumps, direct-acting steam pumps, pulsometers, gear-driving pumps, steam hoists, hand or power cranes, pile drivers, single acting steam pile hammers and their equipment

*Class B*.—Plant and machinery which, in fairly constant use, is likely to have a life of ten years. For example, tramway plant including tracks, locomotives and all types of wagons, air compressors boring tools, rock drills, stone crushers, mortar mills, concrete mixers, high-speed double acting steam pile hammers, high-speed vertical oil or petrol engines direct coupled to pumps, steam wagons and tractors, motor road-rollers, lorries and trailers

7. The hire charges for heavy plant and machinery lent to other Public Works divisions, Government departments, local bodies, and contractors for use on Government works shall be fixed to cover interest, depreciation, repairs on return or overhauling—all repairs while the plant is running will be borne by the hirer—storage and handling charges, and the annual rates for the present are fixed at—

| | |
|---|---|
| Class A — 12 per cent | On original cost or appraised value where cost is not known or probable cost of renewal. |
| Class B — 25 per cent | |

8 The monthly rate shall be the annual rate divided by the probable number of months the plant is likely to be out on hire during the year. The rent so arrived at shall be charged for each month or fraction of a month the plant is out on hire, the period of hire counting from the date the plant and machinery leaves the Stores to the date it is returned thereto. An exception to this general rule may be allowed by the Officer in charge of the Stores, where the interval between the two periods of hire is likely to exceed two clear months, and the officer concerned notifies the fact to the Officer in charge of the Stores, who, if he has no demand for the plant in question elsewhere, may allow it to remain in the custody of the hirer for the period of idle time, free of rent. No idle time of less than two months' duration will be considered, and the total period of idle time permissible between two periods of hire should not exceed six months. The actual idle time for which no rent charge will be made shall be definitely specified in the sanction, and no extension of the period will be allowed. The Officer in charge of the Stores shall not be called upon to bear any charges for care-taking or maintenance during the period of exemption from rent.

9 When heavy plant and machinery is lent to private parties or to contractors for use on works other than Government works, the rent charged shall be double the rate prescribed in rule 7 above, except in the case of boring tools, for which the ordinary rate of 25 per cent shall be charged.

10 In cases of real emergency, mamutis, crowbars, axes, baskets and other tools of like nature may be hired to a local body or to a contractor, but such tools must be returned to store as soon as possible after the emergency ceases. The hire to be charged under this paragraph will be at the rate of 24 per cent per annum on the original cost of the tools

*No.* 1250.—The following G.O. Press No. 567 I., dated 28th October 1925, is published :—

*Read*—the following :—

"G.O. No. 234 I., dated 25th June 1908

*Order.*

In G.O. No. 234 I., dated 25th June 1908, the Government issued instructions for the apportionment between irrigation and local funds of the cost of the construction and maintenance of bridges over irrigation canals and channels. It was then laid down in the first instruction that 'if the construction of a new irrigation channel interferes with an existing public right of way the cost of the reconstruction and subsequent maintenance of the bridge, road dam or other contrivance necessary to restore communication shall be met from irrigation funds'. The Government have now decided that the words 'subsequent maintenance' shall be taken to mean 'maintenance to a standard adequate to the requirements of normal road traffic from time to time, if the right of way interrupted was a road.'

2. In the present case of the bridge over the Masulipatam canal at Chintagunta palam the cost of reconstructing the bridge to a standard sufficient for normal motor traffic will accordingly be borne from irrigation funds, if the canal crossed a previously existing road. It is presumed that this was the case since the present bridge was constructed by the Public Works Department and the road is apparently a main road from Masulipatam to Challapalli.

3. The municipal council should continue to maintain the road way across the bridge when it is reconstructed and the cost of this should be borne from municipal funds.

G O, No. 567 I, dated 28th October 1925

(iii)

From the Secretary, East Godavari District Associations, No 96, dated 29th September 1925.

*Order*

In G.Os. Nos. 234 I. dated 25th June 1908, and 567 I, dated 28th October 1925, it is laid down that if the construction of a new irrigation channel interferes with an existing public right of way, the cost of construction and upkeep of the bridge to restore communication inclusive of the maintenance of the bridge to a standard adequate to the requirements of normal road traffic from time to time, shall be met from Irrigation funds. The question has now been raised as to the responsibility for the maintenance of the 'approaches' to and the 'appurtenances' of such bridges. The Government consider that railings, side walls, and embankments up to the limit of the Public Works Department land on each side should be treated as appurtenances to the bridge and be maintained by the Public Works Department and that beyond the limits of the Public Works Department land, all should be considered as part of the approach road and maintained by the local body concerned.

### Notice to Madras Candidates.

IV. Candidates who have applied to be examined at Madras are informed that they will have to sit for their examination at places—*vide* paragraph II *supra*.

No hall tickets will be issued (except in the case of Typewriting—Lower), but a copy of the nominal list will be posted on the notice board at the entrance to the several places of examination (*vide* paragraph II *supra*) on the 15th November, and candidates are expected to learn their register numbers from this list.

### Notice regarding the Examination in Typewriting.

*Both at Madras and in the Mufassal.*

V. Candidates coming up to typewriting must bring with them their own typewriters—the Remington, Remington Portible, New Model Remington No. 12, Yost, New Century, Smith Premier, Densmore, Empire, Underwood, Underwood Portable, Oliver, Armstrong, Standard Folding, Stearn's Visible, Sun Typewriter, Fox Visible, Salter, Victor Typewriter—Model No. 3 and No. 10, Monarch, Noiseless, Wood Stock Standard, Royal Standard No. 10, Hex Visible, Melle, Mercedes, Demountable, Ehts or L. C. Smith & Bros. machine The candidates will, if necessary, be examined *in batches*, but at least every *four* candidates for the Lower grade and at least every *two* candidates for the Higher grade must have one machine among them.

*In the mufassal*—Heads of institutions who are desirous that their pupils should be examined in batches and private candidates who desire to be

similarly examined should make the necessary arrangements with the Chief Superintendent concerned *two* days before the examination and furnish him with all necessary information as to the number of candidates and machines and the time at which each batch should attend on the day fixed for the examination.

*At Madras.*—Heads of institutions and private candidates should make similar arrangements with the Secretary to the Commissioner for Government Examinations on the 19th November between 11 a.m. and 5 p.m. at the Old College, Nungambakam.

*At Madras.*—In the case of candidates for the Lower grade, tickets of admission specifying the particular batch (first or second and so forth) in which they elect to appear will be issued on that day. These tickets should be shown at the entrance. Candidates who produce tickets will be admitted to the batch specified in the tickets. Candidates who do not provide themselves with tickets cannot claim to be admitted to any particular batch. They will be admitted only, if spare seats are available, in the hall, i.e., after seats are reserved for those who have registered their names and obtained tickets for the batch. Candidates who do not hold tickets will accordingly have to wait at the entrance from the hour of commencement of the first batch and take their chance of being provided with seats in the first or in any subsequent batch. To avoid all inconvenience and possible disappointment, heads of institutions and private candidates are particularly requested to call at the office on the 19th November and obtain tickets. No tickets can on any account be sent by post whether to heads of institutions or to private candidates.

Candidates for the Higher grade may appear for the first or second batch at their option and no tickets accordingly are issued for this grade.

*At Madras.*—Managers and instructors of institutions and other persons who wish to be allowed into the examination hall to inspect the machines and remedy any defects should call at the office on the 19th November and have their names registered. Tickets of admission specifying their names, the institutions to which they belong, etc., will be issued to them and these should be produced at the entrance to the examination hall.

Candidates that have such a separate machine and that do not want to be examined in batches are expected to appear for their examination with the third batch for the Lower, and with the second batch for the Higher, examinations.

Managers and instructors of institutions concerned will be allowed into the examination rooms *in the intervals between the examinations of the various batches* to inspect the machines and to remedy any defects but not between the first and second papers.

*If* a candidate reports to the Superintendent that his machine has gone out of order, the Superintendent will intimate this to the manager or instructor, if he is waiting outside on the premises, and will permit such manager or instructor to enter the hall or room (though the candidates may be at work) to inspect the machine and to remedy the defect or to supply another machine. It must, however, be clearly understood that the Superintendent incurs no responsibility in this matter, his action will be purely *ex gratia*, the whole responsibility resting on the candidate and the manager or instructor.

A similar concession will be allowed in the case of a private candidate, if he has some one outside who is willing to inspect the machine and put it right, etc.

*No extra time will be given to candidates to compensate for loss of time while the machine is out of order and being put right.*

Attention is drawn to the following rules:—

(1) No candidate will be allowed to enter the examination room unless he wears a clean and decent dress, and in all cases where good manners require it, a suitable covering for the head, nor will he be allowed to keep his shoes on unless they are shoes of English pattern, and socks and trousers are worn also.

No candidate suffering from any contagious disease will be admitted to the examination room.

2. No candidate will be allowed to quit the examination room on any day until the expiration of half an hour from the time fixed for the commencement of the examination, and candidates arriving after the expiration of that half hour will not be admitted.

3. No candidate will be allowed to re-enter the examination room during the hours of examination after once quitting it, nor to leave the room without finally giving up his answer papers.

4. Any candidate detected in speaking to, or in any way communicating with, any other candidate will be at once removed from the room and the circumstance reported to the Commissioner.

5. Any candidate who does not behave properly towards the Chief and Assistant Superintendents of the examination, or is suspected of having had recourse to malpractice of any kind, is liable to have his examination invalidated and also to be debarred from appearing again for any of the examinations under the control of the Commissioner for such term of years as the Commissioner may think fit; or, *if the Commissioner is not satisfied for any reason whatever as to the trustworthiness of his results*, he may be required to undergo a re-examination at some future date to be fixed by the Commissioner in any one or more of the subjects of the examination for which he appeared, his success or failure being determined on the results of such re-examination.

6. *No candidate will, on any account, be allowed to take into the examination room ink, slates, books, ruled sheets, manuscripts or papers of any kind.* Any one detected in the violation of this rule or having recourse to any unfair practices will be removed from the room, and the occurrence reported to the Commissioner. The use of mathematical instruments for drawing figures or ruling lines will, however, be allowed.

7. Candidates whose names are not in the printed list furnished to the Superintendents must submit a written declaration through the Superintendents giving full particulars in regard to themselves, including their address, and furnish such evidence as may be possible of their having applied for admission to the examination at the proper time and paid the prescribed fees. The answer papers of such candidates will not be valued unless it is clear that the omission of their names is due to no fault of theirs.

8. Candidates choosing to change their place of examination without previous permission, or appearing at any centre other than the one at which they ought to have appeared according to the notice published in the Gazette, must not expect to have their papers valued or their results published. In all cases where permission has been granted, the memorandum or letter permitting the change should be produced for the satisfaction of the Superintendents.

9. Candidates may have to write their answers on both sides of the paper supplied to them and they will receive the necessary instruction on this point in the examination hall from the Chief Superintendent of the examination.

10. A candidate having completed his paper will rise from his seat and remain standing until the Superintendent takes his answer papers. Any candidate wishing to ask any question of the Superintendent will pursue the same course, but will on no account leave his place.

11. Any answer papers, sent up without the candidate's name and number affixed, will not be valued. The answer papers should be stitched or pinned together at the upper left-hand corner, and the whole folded in *two*, lengthwise (not crosswise into four). The place of examination and the name

and number should be written out clearly by the candidates on the top right-hand side of the first page of the answer paper, as well as on the top of the paper after it is folded.

12. Candidates are forbidden to note down the answer to any question on the question paper itself; they will not be allowed to take any papers, except their question papers, out of the examination room.

13. Candidates are forbidden to tear up paper, or to throw ink or papers on the floor. All "spoilt copies, etc.," should be left on the desk where the candidate has been writing

### AUCTION SALE OF BADJANAPARA AND BHAVANAPAD' EXTENSIONS OF THE NAUPADA SALT FACTORY.

The public are hereby informed that the right to manufacture salt under Modified Excise system in the Badjanapara extension of the Naupada factory measuring 241·13 acres will be sold by auction by Assistant Commissioner of Salt Revenue, Northern division, at the office of the Inspector of Salt Revenue, Naupada circle, Naupada, at 10 a.m. on Tuesday the 17th November 1925, subject to the conditions below.

The public are hereby informed that the right to manufacture salt under Modified Excise system in the Bhavanapad extension of the Naupada factory measuring 28·83 acres will be sold by auction by Assistant Commissioner of Salt Revenue, Northern division at the office of the Inspector of Salt Revenue, Naupada circle, Naupada, at 11 a.m. on Tuesday the 17th November 1925, subject to the following conditions.

CONDITIONS.

1. A deposit of Rs. 500 must be made by every intending bidder previous to bidding.

2. No person will be allowed to bid for another unless he holds a power of attorney from him authorizing him to do so. The selling officer may for valid reasons refuse to accept any bid and in cases of dispute his decision shall be final. If for any reason the highest bid is rejected, the selling officer may at his discretion either accept the next highest bid or commence the auction again.

3. The sale will be subject to the confirmation by the Collector of Salt Revenue who will not be bound to accept the highest or any bid.

4. As soon as possible after the auction is completed, the deposits made by the unsuccessful bidders will be returned to them.

5. The successful bidder shall, if required by the selling officer, make a further deposit equal to one-fourth of the purchase-money. Should he fail to do so, the deposit made by him under condition 1 *supra* will be forfeited and the extension disposed of as the Collector of Salt Revenue may determine.

6 On receipt of intimation of the final acceptance of the bid, the successful bidder shall at once pay the whole amount of the bid after deducting from it the amount of deposit already paid by him. Should he fail to do so, the deposits made by him will be forfeited and the extension sold or otherwise disposed of

7 Resales effected under condition 6 will be at the risk of the defaulting bidder who will forfeit all again and in the event of loss will be required to make good the deficiency between the amount payable under the terms of the original sale and that payable by the successful bidder at the resale. In the latter case, the forfeited deposits will be deducted from the loss arising from the resale and the remainder, if any, will be recoverable from the defaulter in the manner laid down in section 34 of the Madras Salt Act IV of 1889. Should, however, the forfeited deposits be greater than the loss by resale, the whole of such deposits will be credited to Government. The defaulting bidder will be similarly liable if the extension is disposed of otherwise than by resale and such disposal results in loss to Government as compared with the original sale.

8 Licence to manufacture salt under Modified Excise system will be granted to the successful bidder after he has accepted a lease with no compensation clause (the draft form of which may be seen at the circle office). The lease will commence from 1st January 1926 and terminate on 31st December 1942.

9 Government will have a lien on 50 per cent of the salt produced in each season

10. The accepted bidder should pay interest on capital cost of works already executed.

11. Future works which may be necessary should be executed by the accepted bidder himself at his own cost.

12 The accepted bidder will not be entitled to the refund of the bid amount paid or to the possession of the land if and when the extension is closed or the lease determined.

C. S. ROLLAND,
*Asst. Commissioner of Salt Revenue, Northern Division.*

2. എന്നാൽ ആക്ടിലെ ചില വകുപ്പുകളെ സംബന്ധിച്ചു ഭരണസംബന്ധമായ വൈഷമ്യങ്ങൾ ഉണ്ടായിട്ടുണ്ട്. വിശ്രമത്തിനുള്ള ഏർപ്പാടിനെ എപ്പോൾ പ്രയോഗത്തിൽ വരുത്തുന്നു എന്നുള്ള 21 - ാം വകുപ്പിനെ സംബന്ധിച്ചുള്ളതാണ് ഒരു വൈഷമ്യം. ചില വ്യവസായങ്ങളിൽ ഈ വകുപ്പിലെ നിബന്ധനകൾ നടപ്പാക്കുന്നതു പ്രയാസമായിട്ടുള്ളതെന്നു അനുഭവത്തിൽ കണ്ടിട്ടുണ്ട്. ആ വൈഷമ്യം തീർക്കുവാൻ കഴിയുന്ന വല്ല ഏർപ്പാടുണ്ടാക്കുവാൻ എന്നു ആലോചിപ്പാനും മറ്റു നിബന്ധനകളെ സംബന്ധിച്ചുള്ളായിരിക്കാവുന്ന മറ്റു വല്ല വൈഷമ്യങ്ങൾ ഇന്ത്യാ ഗവർണ്മെന്റിനെ ബോധിയിപ്പിക്കുവാനും 1923 ഏപ്രിൽ മാസത്തിൽ തന്നെ ഗവർണ്മെന്റിനോട് ആവശ്യപ്പെട്ടിരുന്നു. അവരുടെ മറുപടികൾ കിട്ടിയപ്പോൾ പ്രധാന പേലശാല ഇൻസ്പെക്ടർമാരുടെ ഒരു യോഗം വിളിച്ചുകൂട്ടി. ഈ യോഗം 1924 ആഗസ്റ്റ് മാസത്തിൽ സിംലായിൽ കൂടുകയും അതിൽ ഒരു സംസ്ഥാനത്തിലെ ഒഴികെ ബാക്കി സകല സംസ്ഥാനങ്ങളിലെയും പരിശോധക ഉദ്യോഗസ്ഥർ വർഷത്തിലെ ധോവികളായ ഉദ്യോഗസ്ഥന്മാർ ഹാജരാകുകയും ചെയ്തു. കിട്ടിയിരുന്ന ആലോചനകൾ നോക്കി ആക്ട് പരിശോധിച്ചതിനു ശേഷം ആക്ട് കുറെ കൂടി എളുപ്പമായി നടത്തുന്നതിനു വേണ്ടി ചില സംഗതികളിൽ കുറെ കൂടി ഇളവുവാക്കിയും മറ്റു ചില സംഗതികളിൽ ലെഫ്റ്റനന്റ്ഗവർണർ

വർദ്ധിപ്പിച്ചു നടപ്പാക്കുക ചെയ്യണമെന്നും യോഗം ശിപാർശചെയ്തു. ആ യോഗത്തിന്റെ ശിപാർശകളെയും തദ്ദേശ ഗവൺമെന്റുകളുടെ അഭിപ്രായങ്ങളെയും അടിസ്ഥാനപ്പെടുത്തിയാണു് ഇപ്പോൾ കാണുന്ന ഭേദഗതികൾ ചെയ്വാനുദ്ദേശിച്ചിരിക്കുന്നതു്. അവയെ താഴെ കാണുന്ന ഖണ്ഡങ്ങളിലുപ്പറഞ്ഞിരിയ്ക്കുന്ന കാര്യങ്ങളിൽ വിവരിച്ചിട്ടുണ്ടു്.

8 എന്ന ഖണ്ഡം.—1911 ലെ വേലശാല ആക്ട് 21 (1) (a) എന്ന വകുപ്പു സംബന്ധിച്ചു രണ്ടു വൈഷമ്യങ്ങൾ ഉണ്ടായിട്ടുണ്ട്. പ്രവൃത്തിയെടുക്കുന്ന യാതൊരാളേയും ഉച്ചയ്ക്കു അരമണിക്കൂറിലധികം പണിയെടുക്കുവാൻ ആവശ്യപ്പെടുവാൻ പാടില്ലാത്തതിനാൽ ഉച്ചയ്ക്കുള്ള ഇടവേള ഏപ്പോഴും ഒരേ സമയത്തായിരിക്കുന്നതായി പണിയെടുക്കുന്നവർക്ക് തിട്ടമുണ്ടായിരിക്കുന്നതിനും ഒരു മണിക്കൂർ നേരത്തെ വിശ്രമകാലമെങ്കിലും അവർക്കു ലഭിക്കുന്നതിനും ഉപയോഗമുണ്ടായിരിക്കുന്നതാണ്. ഒരു മണിക്കൂർ നേരത്തെ രണ്ടു ഇടവേളകളെങ്കിലും കിട്ടുന്നതിനും എപ്പോൾ ചെയ്യാനാണ് ഈ ഉപവകുപ്പുകൊണ്ടുദ്ദേശിച്ചിരുന്നതു. രണ്ടാമതു പറഞ്ഞ സംഗതിയെപ്പറ്റി നിയമനിർമ്മാണത്തിനൊരു ഉദ്ദേശം സംഭവിച്ചതായി എന്നു കരുതുവാൻ സംശയമാണ്. അതേപോലെ മണിക്കൂറിനിടയ്ക്കു രണ്ടു ഇടവേളകളും ഒരേ എപ്പോഴും അനുസരിച്ചു നടപ്പാൻ തീരുമാനിക്കുന്നപക്ഷം പ്രവൃത്തിയെടുക്കുന്നതിനുള്ള ഏഴരമണിക്കൂർ ഇടയ്ക്കുനിന്നു രണ്ടു ഇടവേളകൊടുക്കുന്നതായി (ii) എന്ന ഖണ്ഡം വ്യാപ്തീകരിക്കുന്നതാണ്. ചെയ്യണമെന്നുദ്ദേശിച്ചിരിക്കുന്ന കാര്യത്തെ ഭേദഗതിയുണ്ടായിരിക്കുന്നതിനാൽ കൂടുതൽ ഒരുകാര്യത്തെ ഉദ്ദേശിക്കുന്നതിനായിരിക്കുന്നതാണെന്ന് നിശ്ചയിച്ചിരിക്കുന്നു.

## CULTIVATION STATEMENT—APRIL TO AUGUST 1925.

[On an average of the five years ending 1924–25, the area sown from April to August represents 38 per cent of the cultivation on dry lands and 42 per cent on wet lands.]

*General.*—There was heavy rain on the West Coast in August 1925 and the rain-fall in the Circars was also good. In South Kanara and West Godavari crops were slightly damaged in parts by excessive rain. The rainfall during the month in the rest of the Presidency was fair except in Salem, Coimbatore, Madura, Ramnad, and Tinnevelly, where it was poor. Water-supply was good in the Circars and on the West Coast and sufficient in parts elsewhere, but inadequate in Bellary, Anantapur, and parts of the Central and the Southern districts. Transplantation or sowing of paddy was general in most districts during the month. Other crops sown were cumbu in the Central districts, ragi in Chingleput and the Central districts, korra and cholam in the Deccan, cotton in Guntur and the Deccan, groundnut in the Deccan, South Arcot, and the Central districts, and castor in Guntur, Anantapur, Cuddapah, Chittoor, and North Arcot.

Sowings were generally satisfactory in most districts, but were retarded in Bellary by want of adequate rainfall. The figures of cultivation reported from this district are not however complete as the harvests in the Western taluks were engaged in connexion with the revision of the village accounts consequent on the introduction of resettlement.

2. *April to August—Sowings—*

(*a*) *Dry lands.*—The total area was more than the average by 10 per cent, but was 3 per cent less than last year. The increase as compared with the average was mainly in the Circars and the Carnatic and in parts of the Deccan and the Central districts.

(*b*) *Wet lands.*—The total area exceeded the average and last year's figure by 15 and 11 per cent respectively. The increase was mainly in the Circars.

3. Figures by districts are given in the statement appended.
